Discuss ensued on how to set the school's environment to foster student creativity. Dr. McMorran distributed "Easton School District Long-Range Planning" notebooks to all committee members and reviewed its contents.

Key points:

1. Goal to get academic scores up but without sacrificing the child's childhood - need a balance between work and play. It's important to have a playful educational environment.
2. Need technology-enabled personalized learning. We are currently using too much technology and 'space.' The future will see more learning in groups with fewer teachers.
3. Must not lose sight of a middle school education.
4. Teachers and the school principal are the #1 and #2 factors in a student's success.
5. Can't close half a building.

The committee members discussed how to move forward. It was stressed that no decisions had yet been made. Communication with the public will be critical. The next meeting (no date set) should begin to discuss the various options.

- V. **Public and Committee Member Comment** – None
- VI. **Adjournment** - Kachele, Wilkes. Approved. Unanimous.  
The meeting was adjourned at 9:02PM

Respectfully Submitted by Dan Underberger, Committee Chairperson
