

Instruction

Posting of Student Work/Photographs on Web Sites

The District has an obligation to protect student safety and to balance this with the need for open communications when using the Internet. Therefore, the Board established these guidelines to fulfill this obligation.

The purposes of these guidelines are to:

1. inform school staff of the possible dangers of allowing students to publish identifying information on the Internet;
2. recognize that there are potential advantages of allowing students to publish identifying information on the Internet; and
3. provide to schools a recommended set of guidelines governing how student identifying information should be allowed in publishing on the Internet.

Guidelines:

- Only first names be used in published student work.
- Pictures that are a part of student publishing should not include identifying information.
- Under no circumstances should a student's home address or phone number be included.
- If replies to published student work are appropriate, the sponsoring teacher's address should be the e-mail address displayed, not the student's.
- In special circumstances with parent-signed release, identifying information can be added.
- Directory information will not be posted on the web for students who have requested, in writing, that such information not be released.

It is recognized by the Board that there may be circumstances where it might be appropriate for high school students to provide identifying information along with work published on the Internet. An example of such an appropriate circumstance might be college entrance or employment opportunities that may be enhanced by viewing a student's work on the Internet.

In making this determination, the high school student and the supervisory staff member must weigh the potential for risk against the perceived advantage of posting this identifying information. Parental approval, in addition to that of school staff, is required where there is uncertainty regarding the posting of identifying information for high school students.

Students shall retain all rights to work they create using the District's electronic communication.
