Testing Program

A plan of system-wide testing in addition to mandated statewide assessments shall be developed and implemented as one indication of the success and quality of the district's total educational program. In the case of individual students, standardized criterion-referenced achievement tests, in combination with other criteria, can provide an indication of student achievement. When appropriate, students may also be tested for mental ability, aptitude and interest using norm-referenced tests.

The purposes of the district-wide testing program are to facilitate and provide information for the following:

1. ***Student Achievement*** - To produce information about relative student achievement so that parents/guardians, students and teachers have a baseline against which to monitor academic progress. Within the limitations of group testing instruments, the information should be useful to serve as a validation device for other measures of student progress. Standardized tests incorporating items that are benchmarked to a set of criteria of specific academic standards are best suited for this objective. Norm referenced achievement tests can also be applied here as an additional data source.
2. ***Student Counseling*** - To serve as a tool in the counseling and guidance of students for further direction and for specific academic placement. Well-conceived norm-referenced tests are most helpful for this goal.
3. ***Instructional Change*** - To provide data that will assist in the preparation of recommendations for instructional program changes to:
 - a. Help teachers with instructional decisions, plans and changes regarding classroom objectives and program implementation;
 - b. Help the professional staff formulate and recommend instructional policy; and
 - c. Help the Board of Education adopt instructional policies.

Criterion referenced standardized tests that use items that are benchmarked to a set of specific academic expectations are best suited for this objective.

4. ***School and District Assessment*** - To provide additional indicators of the progress of the district toward established goals. The testing program is an integral part of the district's needs assessment and evaluation programs. The program should be developed primarily for furnishing needed information to decision makers, including the Board, administrators, teachers, parents/guardians and students. The needs of these various groups shall be clearly identified, and the testing program shall be limited to obtaining that information which is needed and useful. Standardized tests that use items that are benchmarked to a set of criteria of specific academic standards are best suited for this objective.

Instruction

Testing Program (continued)

Instruction Research: Testing Program: In planning, every effort will be made to see that testing contributes to the learning process rather than detracts from it. Efforts shall be made to incorporate necessary culture-free and culture-fair tests to assure reasonably accurate measurements. The district shall not discriminate in the methods, practices and materials used for testing, evaluating and counseling students on the basis of sex, race, national origin, creed, sexual orientation or physical, mental, emotional or learning disability. Discrimination complaints shall be processed in accordance with established procedures. Parents shall be notified prior to any individual student testing, beyond that, which is part of the regular classroom routine. Parental notification shall include the reason for the testing and an explanation of the test to be used. All such tests results shall be shared with parents. Staff will receive in-service education in the use of designated tests, confidentiality issues and interpretation of test results. A periodic review and evaluation of the district's testing program will be conducted.
